Projects

A **(Pokedex)** web application, built with HTML, CSS, and JavaScript that loads data from an external API and enables the viewing of data points in detail.

Building the server-side component of a **(movies web application)**. The web application provide users with access to information about different movies, directors, and genres. Users can sign up, update their personal information, and create a list of their favorite movies.

Using React to build the client-side for an application called **(myFlix)** based on its existing server-side code (REST API and database)

A **(MeetApp).** serverless PWA that can display and filter meetup events from the Google calender API. It is developed using Test-Drive-Development techniques to ensure a high test coverage rate.

A **(Chat App)** for mobile devices using React Native. The app provide users with a chat interface and options to share images and their location.

Using Angular to build the client-side for an application called **(myFlix)**, based on its existing server-side code (REST API and database), with supporting documentation.

Certifications & Courses

Enterprise Resource Planning (ERP SAP)

Project Management Professional (PMP)

Residence Permit

Angehöriger Art 10 rl 2004/38/EU. (Gainful employment allowed).
